Laith Assaf

East Lansing, MI | (248) 480-5783 | assaflai@msu.edu | linkedin.com/in/laith-assaf- | github.com/Novapool

EDUCATION

Michigan State University, College of Engineering Expected May 2027
BS Computer Science, Concentration in AI/ML | Minor in Economics | Dean's List x3 East Lansing, MI

EXPERIENCE

PC Technician Intern May 2026 - Present
Onsite Support Team, Delta Dental Okemos, MI

- Built LLM agents in **Copilot Studio** and AI Builder across 3 Power Automate workflows, converting natural-language requests into structured records using live Ivanti asset and user data retrieved via API
- Shipped an asset management workflow saving 5 minutes per run and **$11K annually**, and am piloting an agent that parses incoming emails to update tickets, coordinating both rollouts across multiple IT teams
- Imaged and configured 100+ endpoints through Ivanti, enrolling each device in Active Directory and Intune so it reached its user with policy applied, and backing up and wiping each drive at the end of the device lifecycle
- Resolved 100+ tickets spanning laptop upgrades and hardware faults, restoring locked-out users through Azure BitLocker recovery and CyberArk credential access, and tracing network port issues with Cisco DDI

IT and Media Services Support Associate May 2023 - May 2026
MSU College of Osteopathic Medicine East Lansing, MI

- Supported 100+ classroom AV and conferencing systems across 4 buildings serving 1,200+ students, resolving 50-70 tickets weekly and maintaining **99.5% uptime** during live lectures through a documented troubleshooting process

PROJECTS

Real-Time Audio Classification | *YAMNet, Flask* | **2nd Place, MHacks** October 2025

- Placed 2nd of 300+ participants at MHacks 2025 with a real-time audio classifier that alerts hearing-impaired users to surrounding sounds, reaching **95% accuracy** at <50ms latency across 500+ sound categories
- Deployed the YAMNet model on dedicated edge AI accelerators so all inference runs on-device without a cloud connection, streaming hazard alerts to a live web interface through a Flask + WebSocket pipeline

Pokemon Battle Agent - Reinforcement Learning | *PyTorch, PPO, MCTS* May 2026 - Present

- Trained a battle agent by imitating human replay data, then fine-tuned it with reinforcement learning (PPO) and added MCTS at decision time to plan several moves ahead, reaching a **93%** win rate against scripted baselines
- Built a parallel evaluation harness that runs 5,000 battles on every push through GitHub Actions CI, validating each change across 11 development milestones and catching and correcting **four evaluation flaws** in earlier results
- Tracked every training and evaluation run in MLflow with its code version, seed, and checkpoint, then reproduced the recorded results across 12 re-evaluations of 5,000 battles each

Agentic Development System | *Claude Code, subagents, hooks, MCP* January 2026 - Present

- Designed a 10-agent orchestration pipeline in which a planner hands work to parallel builder, reviewer, and tester agents through a shared plan file, with automated hooks enforcing conventions across **44 repositories**
- Wrote a planning protocol requiring each milestone to define a testable success criterion before implementation

LEADERSHIP

Michigan State University | AI Club January 2025 - Present
Workshop Coordinator & Project Lead East Lansing, MI

- Delivered 8+ workshops on local LLM deployment (Ollama, LM Studio), agent orchestration, and PyTorch to **500+ attendees** at 90% retention and 4.8/5 satisfaction; led a 4-student team building an LLM course predictor

TECHNICAL SKILLS

Machine Learning: PyTorch, NumPy, pandas, scikit-learn, reinforcement learning, CNNs
LLMs & Agents: LLM APIs, Copilot Studio, Power Automate, MCP, agent orchestration, Ollama, evaluation
Languages & Backend: Python, TypeScript, SQL, C++, C#, FastAPI, Flask, PostgreSQL, REST APIs, WebSockets
Infrastructure: Docker, Linux, Git, GitHub Actions CI, MLflow, Railway, Vercel
